

CENTER OF EFFORT

2012 CHARDONNAY, 'GIALLO SOLARE' – Edna Valley AVA

'Giallo Solare' – the name of the color in which this bottle is clad, translates approximately to 'Solar Yellow.' Appropriately, it was entirely harvested from Block 71 in our estate vineyard - a steep slope that faces the rising sun each morning. Extraordinary, with pure white peach and apricot fruit character, richness on the palate, and a long, mineral-laden finish. v.2012 represents the first-ever bottling of this wine, and we couldn't be more proud of this singular expression of our estate.

WINEMAKING

Our winemaking is intricate. The final blends for our Center of Effort wines are laced together from many individual components, creating detailed, layered, and complete final wines. Occasionally one of these components will speak with a voice so clear and separate that we are compelled to preserve a portion intact.

'Giallo Solare' was fermented and aged in a small concrete vessel, shaped like an egg about as tall as a person. These fermentors are increasingly present in the top tier of wineries worldwide, and have

been a part of the Center of Effort toolkit since 2010. Each vintage, roughly 5-10% of our Estate Chardonnay has been composed of concrete fermented wines, which contribute great texture and richness without obscuring the natural fruit character of the wine. This technique has been a great companion to our blend of new and once-used French oak barrel ferments, which are the backbone of our flagship wines.

This is the first vintage in which we felt that the concrete-fermented wine was complete enough to showcase as a solo bottling – though we suspect that it will not be the last!

Bottled with minimal stabilization, it will require and reward proper cellar conditions.

OCCASSIONALLY ONE OF THESE COMPONENTS WILL
SPEAK WITH A VOICE SO CLEAR THAT WE ARE
COMPELLED TO PRESERVE A PORTION INTACT.
